

Prior to start

1. Setting up account

Email – ***

Password – ***

The above password is temporary until your first login.

To activate your account and set up your own unique password please log in to www.office.com with the above details.

2. Installing software

- a. We use Microsoft Teams as our primary communication platform. To install this on your computer (if not already installed), click 'Install Office' > 'Office 365 apps' from office.com
- b. Ensure Outlook (or a mail client of your choice) is installed, and you are logged in with your company account. This is very important as our primary means of communicating with clients and a close second in team communication.
- c. Download Power BI desktop - <https://powerbi.microsoft.com/en-us/desktop/>
- d. You are free to install any other software as you wish for development. This is a list of software which we use extensively:
 - i. FileZilla: <https://filezilla-project.org/download.php?type=client> – Quickly transfer files between remote servers
 - ii. Postman: https://www.postman.com/downloads/?utm_source=postman-home – Test APIs locally
 - iii. Visual Studio: <https://visualstudio.microsoft.com/downloads/> - Development IDE for .NET
 - iv. VS Code: <https://code.visualstudio.com/> - Development IDE
 - v. SSMS: <https://learn.microsoft.com/en-us/sql/ssms/download-sql-server-management-studio-ssms?view=sql-server-ver16> – SQL Server UI
 - vi. Azure Data Studio: <https://learn.microsoft.com/en-us/azure-data-studio/download-azure-data-studio?tabs=win-install%2Cwin-user-install%2Credhat-install%2Cwindows-uninstall%2Credhat-uninstall>
 - vii. Notepad++: <https://notepad-plus-plus.org/downloads/> - Better than "Notepad"
 - viii. Node version manager: <https://github.com/coreybutler/nvm-windows/releases/tag/1.1.9> - Easily download and switch node versions
 - ix. PowerToys: <https://learn.microsoft.com/en-us/windows/powertoys/> - utilities for Quality of Life improvements
 - x. WinRAR: <https://www.win-rar.com/start.html?&L=0> – zip file manager
 - xi. OpenXML Productivity Tool : [Release Open XML SDK 2.5 Productivity Tool · dotnet/OpenXML-SDK · GitHub](#)

Commented [WA1]: Azure Data Studio also used

Commented [BY2R1]: added

Familiarising yourself with the following technologies used.

Commented [CN3]: SQL and C# to be added

1. SharePoint online – Main platform where most of our solutions are hosted.

- a. <https://support.microsoft.com/en-us/office/get-started-with-sharepoint-909ec2f0-05c8-4e92-8ad3-3f8b0b6cf261>
2. **Power BI** – used for data visualisation of all our customers. This plays a major role in our solutions.
 - a. <https://www.youtube.com/watch?v=Qgam9M8I0xA>
 - b. <https://docs.microsoft.com/en-gb/power-bi/fundamentals/desktop-getting-started>
3. **Power Automate** – we are slowly integrating Power Automate in our solutions. This is a powerful tool which will only become more and more used.
 - a. <https://docs.microsoft.com/en-us/power-automate/getting-started>
4. **SPFx** – integral part of the business as most new solutions use react forms built on the SharePoint framework
 - a. <https://docs.microsoft.com/en-us/sharepoint/dev/spfx/web-parts/get-started/build-a-hello-world-web-part>
 - b. React tutorial - <https://reactjs.org/tutorial/tutorial.html>
5. **Azure** – This is where we host our APIs, SQL Databases, Webjobs, VMs, etc.
 - a. <https://azure.microsoft.com/en-gb/get-started/video/>
6. **ASP.NET Core APIs** - <https://learn.microsoft.com/en-us/aspnet/core/fundamentals/apis?view=aspnetcore-8.0>
7. **DevOps** – we use DevOps for storing our code libraries, documents, and quality assurance QAQC
 - a. <https://azure.microsoft.com/en-gb/overview/devops-tutorial/>
8. OpenXML Documentation from Microsoft : [Welcome to the Open XML SDK for Office | Microsoft Learn](#)
9. **Microsoft Training**
 - a. Fennex is a Microsoft Silver Partner, as such we have multiple team members work towards obtaining certification for various different parts of the business. Your mentor will outline a learning path for one of these certifications which will best suit your onboarding.

In addition to the above guides and getting started videos from Microsoft we have our internal training videos outlined below. These cover a few key aspects of the business such as Hotynacs, SPFx form creation, etc.

Videos (in watch order):

- 1) **Creating SharePoint site/lists**
 - a) <https://web.microsoftstream.com/video/9b2f9df6-c58b-464b-96e5-3423f3e87efc?channelId=21f48a92-c935-4a83-a7a4-85049f0ea3ad>
- 2) **SPFX**
 - a) <https://web.microsoftstream.com/video/64ae4a45-5aef-4c22-a66e-5ccf2307e026?channelId=21f48a92-c935-4a83-a7a4-85049f0ea3ad>
1:23:40
 - b) <https://web.microsoftstream.com/video/46ba4eaf-6162-4056-9ade-74a7e676dbb2?channelId=21f48a92-c935-4a83-a7a4-85049f0ea3ad>
- 3) **Power Bi**

Module 1 - [Get started with Microsoft data analytics](#)

Module 2 - [Prepare data for analysis](#)

Module 3 - [Model data in Power BI](#)

Module 4 - [Visualize data in Power BI](#)

Module 5 - [Data analysis in Power BI](#)

Module 6 - [Manage workspaces and datasets in Power BI](#)

4) [Hotsync](#)

a) <https://web.microsoftstream.com/video/d20cd39a-f260-4c38-9ccb-f2b1bece4807?channelId=21f48a92-c935-4a83-a7a4-85049f0ea3ad>

5) API

a) Create a .net core web api (MVC) using the sql hotsynced data without using Entity Framework

[CRUD Operations Using ASP.NET Core And ADO.NET \(c-sharpcorner.com\)](#)

Steps to achieving goals:

1. Gather the following data from our customers' websites

- a. Name
- b. Address
- c. Number of Rigs
- d. Number of Jack Ups
- e. Number of MODU's
- f. Site URLs

Customers: Noble, Transocean, Valaris, Shell, Vantage, Shelf

2. Create a SharePoint list which will store this information.
3. Develop a custom SPFx form which will allow users to edit the previously created list.
4. Create a 'Hotsync' C# application which will retrieve information from the SP list and store it in an Azure SQL Database. (Stretch target)
5. Create a .net core WEB api (MVC) without Entity framework to perform CRUD operations on the hotsynced data.
6. Create a Power BI report to visualise the data.
7. Add an OpenXML based Export endpoints to export the hotsynced data in a tabular format in excel file – Sample file link - [OpenXML Sample Excel.xlsx](#)
8. Add an OpenXML based Export endpoints to export a word (docx) document based on the sample provided – Sample file link - [OpenXML Word Sample.docx](#)

Meet the Fennex team:

Some basic knowledge of the team and areas where they excel

- ❖ Adrian Brown (Aberdeen) – Adrian is the managing director and as such comes with years of knowledge of the oil and gas industry as well as planning and executing projects. Power BI expert and SharePoint competent.
- ❖ Nassima Brown (Aberdeen) – Nassima manages the marketing side of the business

- ❖ Amitesh Anand (India) – Amitesh is the director of technology; he has been involved in the IT industry for many years and as such has obtained knowledge on pretty much any topic you can think of.
- ❖ Bozhidar Yankov (Aberdeen) – Bo is the Technical Lead and a senior developer with vast knowledge on multiple aspects
- ❖ Abhijeet Dasgupta (India) - Abhijeet is a senior developer with extremely vast knowledge on all aspects of the business such as SPFx, SQL, Hotsyncs, Power Automate.
- ❖ Callan Noble (Aberdeen) – Team Lead / Senior Developer, proficient in SPFx forms, Azure AD Management, Hotsyncs, API
- ❖ Matthew Swinbank (Aberdeen) – Team Lead / Senior Developer, proficient in SPFx, hotsync, Power Automate, API
- ❖ William Abbott (Aberdeen) – Team Lead / Senior Software Developer
- ❖ Jude Adi (Aberdeen) – Senior Software Developer
- ❖ Adam Shepherd (Aberdeen) – Senior Software Developer
- ❖ Mitchell Smart (Aberdeen) – Power BI expert
- ❖ Simona Georgieva (Aberdeen) – Highly competent web developer, Power Bi specialist
- ❖ Sean Bisset (Aberdeen) – Software Developer
- ❖ Douglas Boler (Aberdeen) – Data Analyst
- ❖ Bruce Spence (Aberdeen) – Software Developer
- ❖ Risav Chatterjee (India) – SPFx developer
- ❖ Mungo Ganbold (Aberdeen) – Business Developer Manager
- ❖ Saanja Ganbold (remote) – Finance Leader
- ❖ Clemence Weiss (Aberdeen) – Graduate Software Developer

Commented [MS4]: Douglas will need adding
 Ritwick is leaving
 Update these as needed
